

# 1 Wrapping Latex Environments

The following is a demonstration of a custom L<sup>A</sup>T<sub>E</sub>X command with a couple of parameters.

This is verbatim, alltt, text.

Setting escape to False ensures that text in the environment is not subject to escaping...

Setting content\_separator ensures that line endings are broken in the latex just as they are in the input text.  
alltt supports math:  $x^2 = 10$

This is back to normal text...
